Amount of Relief from Public and from Private Funds – 985 Agencies in 108 Cities

L5.29

December expenditures for relief exceed any monthly total previously reported, and confirm the indication in November reports that the winter of 1932-33 will be one of unprecedented need for relief-giving.

Relief agencies in 125 cities of 50,000 or more population spent $4,427,317 more in December than in the preceding month, an increase of 16.5 per cent. The expenditures in December, 1932, were 39 per cent above the amount expended in December, 1931. (Table 1.)

As is illustrated in the chart on the preceding page, public funds have been used to a large extent throughout 1932 for financing the mounting costs of relief. In December, 1931, about 67 per cent of the total expended by the reporting agencies came from the public treasury; in November and December, 1932, about 88 per cent.

December changes in expenditures for different types of relief and in the number of families aided are shown for certain States in Table 2 and for the reporting cities in Tables 3 and 4. General relief continued the rapid rise previously noted. The December figures also indicate the beginning of another upward movement in work relief.

Approximately a million families were aided in December by the agencies in the 125 cities providing this information, as compared with about 900,000 in the preceding month, and 700,000 in December, 1931. The monthly average for general relief per family has tended to become noticeably larger. (Table 4.)

Fifty of the 102 cities for which this information was available financed 95 per cent or more of their total relief in December from public funds. In 36 cities public funds met 75 to 95

per cent of the total cost. Private funds financed 25 per cent or more of the total cost of relief in 16 cities. (Table 5.)

The increase in the number of meals provided in December to the homeless and transient was slightly more rapid as compared with the preceding month than the increase in the number of lodgings. (Table 6.)

The Reconstruction Finance Corporation made funds available during January, 1933, for use in meeting emergency relief needs in California, New York, and 24 States previously aided. (Table 7.)

Large increases were made also during January in the cumulative totals showing the distribution of Government-owned wheat and cotton by the American National Red Cross. (Table 8.)
